Translational Medicine Reports is a new, peer-reviewed international journal publishing articles in the field of molecular biology, biochemistry and nanotechnology applied to the treatment of chronic-degenerative diseases including diabetes, cancer, neurological, cardiovascular and metabolic disorders. Aim of the Journal is to contribute to bridging the gap between basic research and clinical applications from an interdisciplinary perspective.

Translational Medicine Reports addresses researchers and managers in academia and biotechnology, pharmaceutical industry researchers, physician scientists, etc. Original Articles with interdisciplinary topics, reviews, editorials, from bench-to-bedside articles, Conference proceedings, and letters to the Editor are welcome.
